\* Re. UKRI route 3 - publishing open access via a read-and-publish deal will require you to meet the requirements of that deal, e.g. only papers where the corresponding author has a UoE affiliation are eligible to be published open access in the journal. However, any journal we have a read-and-publish deal with should accept the Rights Retention Statement required for UKRI Route 2 / the University of Edinburgh policy, meaning that these journals can be compliant with both the UKRI policy and allow you to follow the Edinburgh policy regardless of whether they are also eligible for compliance via Route 3.
